

The Professional's Choice

CRC FUEL SYSTEM

Maintenance Range

Modern engines are finely tuned and extremely sensitive to deposits that build up on intake valves and ports, fuel injectors and combustion chambers.

Clean and protect the components of your fuel system on a regular basis to reduce engine wear, restore performance and prevent costly repairs.

Use CRC Fuel System Maintenance products to properly maintain your engine, gain optimum performance and preserve its longevity.

CRC Clean-R-Carb Carburetor Cleaner

Powerful carburetor and heavy-duty general parts cleaner that instantly removes carbon build-up and heavy deposits without the use of a wire brush.

- Effective in-place carburetor cleaner
- Instantly removes heavy deposits
- Restores engine power
- Maximises fuel economy
- Non-corrosive degreaser
- Ensures smooth trouble-free performance

CRC Mass Air Flow MAF Sensor Cleaner

Modern engines rely heavily on accurate readings from the MAF sensor to run smoothly and efficiently. A contaminated MAF sensor is likely to cause poor fuel economy, excessive emission, power loss, hard starting, stalling and even gear problems.

- Effectively cleans delicate MAF sensors
- Ensures engine receives accurate readings from MAF sensor
- Safe on sensor element and plastic housing
- Gains 4-10 horsepower
- Improves fuel economy
- Reduces rough idle, decreases hesitation & ping
- Evaporates in seconds, leaves no residue

CRC Throt-L-Body Throttle Body Cleaner

Deposits on the throttle body and air intake system in fuel-injected vehicles interrupt a controlled and undisturbed airflow and can cause stalling, rough idling and other performance issues.

- Effective blend of liquid hydrocarbon cleaning compounds
- Removes harmful throttle body deposits
- Restores engine performance
- Improves fuel economy
- Reduces engine wear
- Safe on protective coatings, sensors, o-ring seals
- Lubricates and protects moving parts
- Prevents build-up of deposits

#5036

CRC Fuel Injector Cleaner

Removes deposits from injector pintles to allow for better flow and more efficient operation. Add to your fuel when filling up, regular use will maintain engine cleanliness.

- Reduces knocks caused by deposits
- Safe for use on all petrol engines
- Reduces engines' demand for higher octane fuel

#5208

CRC Fast Motor Flush

Use prior to carrying out an oil change to thoroughly clean the inside of engine and oil pan. Particularly recommended if change interval has been exceeded.

- Removes sludge, gum and varnish build-up
- Helps free sticky valves and rings
- Suitable for petrol and diesel engines
- Allows oil to flow freely from all parts of the engine

#5327

CRC Diesel Injector Cleaner

Cleans injectors in modern diesel engines and keeps them clean. Restores the essential spray volume necessary for the smooth operation of the engine. Add to fuel when topping up every 5,000km to maximise diesel engine efficiency.

- Prevents power loss and injector fouling
- Eliminates excessive smoking
- Approved for all types of diesel motors including high pressure common rail types
- Suitable for both direct and indirect injection systems

#5040

CRC Jump Start

Kick starts tired and slow-to-start engines into life. Assists low batteries and weak ignition and improves cold or humid starts.

- Protects vital engine parts
- Saves starter motor wear & battery drain
- Anti-knock and anti-corrosive additives
- Lubricates upper cylinders
- Use on Cars, trucks, tractors, boats, and lawnmowers

Get back that new car feeling – Safe and easy with CRC's Fuel System Maintenance products range.
